EDUCATION

ESSEC Business School

Master in Management — GPA 15.5/20 (3.8/4.0) — strategy, data analytics

Paris & Singapore

Sep 2024 – Sep 2026

SRM University AP

B.Tech, Computer Science & Engineering — AI & Machine Learning, First Class with Distinction

Andhra Pradesh, India

Jun 2018 – Jun 2022

EXPERIENCE

AI Strategy & Portfolio Intern at Sanofi - AI Enablement & Commonalities

Sep 2025 – Present

AI product proof of concept, adoption analytics and leadership reporting.

Paris, France

- Built an AI product proof of concept across **GitHub codebases** and **Snowflake datasets**, used by **200+ teams** to discover and reuse existing components.
- Built a daily-refreshed **Power BI** adoption dashboard covering **45,000+ employees** across **45+ countries**.
- Used **Cursor**, **GPT** and **Claude** to turn an ambiguous reuse problem into a validated product workflow.

Business Development Intern at KidsPass.Asia

Nov 2024 – Jan 2025

Partner onboarding, market analysis and founder-facing recommendations.

Singapore

- Reviewed onboarding across **50+ partners and customers**, redesigned the flow with the founding team, and helped onboarding reach **42%**.
- Combined partner feedback, competitor research and KPI analysis to recommend growth and product priorities to the founders.

Founder & Product Lead - Meet Your Plate & Termnex

Independent Ventures

End-to-end product ownership, commercialisation and customer acquisition.

- Built, launched and sold **Meet Your Plate**, a SaaS platform enabling restaurant operators to create digital menus with AR previews; owned discovery, development, onboarding and the sale.
- Building **Termnex**, a Terminal Operating System that connects terminal gates, yards, equipment operators, container inventory and management in one traceable workflow.
- Defined role-based workflows for truck and container movements, QR gate verification, crane assignments, live yard locations, tariffs, document monitoring, notifications and reporting.
- Preparing Termnex for commercialisation by replacing paperwork, spreadsheets and fragmented communication with operational timestamps, ownership and activity logs.

Technology Analyst at Fiserv - Payments Team

Jun 2022 – Jun 2023

Payment transaction analysis and product delivery on a Fortune 500 platform.

Chennai, India

- Traced recurring payment failures in **SQL**, specified the fix, and took it through testing and UAT to go-live.
- Reduced issue-resolution time by **80%** for a **1,000+-person organisation** and cut requirements-scoping time by **40%**.

PROJECTS

NidahAI — Independently designed, built and launched a production voice AI agent; owned LLM prompts, conversation flows, telephony and scheduling integrations. nidahai.com

n8n AI Workflow Automation — Built multi-step automations connecting APIs, webhooks and AI tools; configured triggers, data transformation, routing and error checks to reduce manual work.
