EDUCATION

ESSEC Business School - Paris & Singapore

Sep 2024 - Sep 2026

Master in Management - GPA 15.5/20 (3.8/4.0) - Strategy, Data Analytics

SRM University AP - Andhra Pradesh, India

Jun 2018 - Jun 2022

B.Tech, Computer Science & Engineering - AI & Machine Learning, First Class with Distinction

EXPERIENCE

AI Strategy & Portfolio Intern, Sanofi - AI Enablement & Commonalities

Paris, France

Sep 2025 - Sep 2026

- Led the end-to-end deployment of an internal AI product, starting with discovery sessions across 20+ teams to understand workflows, recurring development bottlenecks, and opportunities to reuse existing components.
- Built and deployed the solution using GitHub APIs, internal commercial datasets, and Snowflake Cortex, enabling teams to identify and reuse existing components rather than rebuilding from scratch, reducing development time and investment effort.
- Worked directly with product, engineering, and business stakeholders to translate workflow requirements into product capabilities, validate outputs, iterate on gaps, and support adoption across internal teams.

Product Analyst Intern, KidSpass.Asia

Singapore

Nov 2024 - Jan 2025

- Spoke directly with 50+ partners and customers, reviewed onboarding data, and redesigned the flow with the founding team, achieving around 40% onboarding conversion.
- Tracked product KPIs in Excel and Power BI, sharing partner trends and competitor insights directly with founders.
- Turned onboarding findings and customer feedback into recommendations that helped shape the next product priorities.

Technology Analyst, Fiserv - Payments Team

Chennai, India

Jun 2022 - Jun 2023

- Analyzed payment transactions in SQL - authorizations, declines, and settlement status - for service reviews on a Fortune 500 payments platform.
- Investigated repeat failures in SQL, tested proposed fixes through UAT and A/B-style comparisons, and supported go-live; reduced issue-resolution time by 80% for a 1,000+ person organization.
- Captured stakeholder requirements in BRDs, FRDs, and acceptance criteria, reducing scoping time by 40%.

PROJECTS

NidahAI - Voice AI Agent

nidahai.com

- Independently designed, built, and launched a production voice AI agent capable of handling inbound conversations, identifying user intent, managing multi-step workflows, and triggering actions through APIs and webhooks.
- Built conversation logic, prompting, telephony integrations, scheduling workflows, and human handoff mechanisms.

Business Explainer - AI Content Automation

n8n / AWS / Meta APIs

- Building an end-to-end AI automation system that autonomously selects educational business topics, generates structured Instagram content, creates post assets, and sends previews to WhatsApp for human approval.
- Designed approval, rejection, regeneration, expiry, and publishing workflows using n8n, AWS AI services, APIs, webhooks, and Meta WhatsApp/Instagram integrations, with a human-in-the-loop publishing gate.
